- 6 Weeks Machine Learning Course on Coursera,2020
- 60 Days Summer Training in Python development and Django web framework from NareshiT, Hyderabad 2019.
- 30 Days Winter Training in Java, Lucknow U.P 2019
- 45 Days Summer Vocational Training in Shaheed Bhagat Singh State Technical Campus,Ferozepur,Punjab 2018

TECHNICAL SKILLS

- Programming : Python, Core Java(Basic)
- Digital Technology : Machine Learning, Deep Learning
- Web Technology : HTML, CSS
- OS : Windows 10
- Database : MySQL
- Clean Coding and Competitive Programming

Project Undertaken

- **Project 1:** Spam Email Classifier
  Objective : The primary objective is to differentiate the spam and ham(legitimate) emails.
  Description : The core of the project is based on the Naïve Bayes Classifier which deals with text data. When a e-mail given to model it tries to predict whether it is ham/spam e-mail.
  Link : https://github.com/Yogeshpandey01/SpamEmailClassifier/tree/master

- **Project 2:** Car Price Prediction
  Description : The primary outcome of this project is that on the basis of Car features the model will predict the price for that specific car. The Model is already deployed on the Heroku platform.
  Link : https://carppredictions.herokuapp.com/

- **Project 3:** Malaria detection Classifier
  Objective : To check whether a person is suffering from Malaria disease or not.
  Description : This project works over CNN model, and model is trained on human blood cell images. When a blood cell image given to model ,it will predict whether the blood cell is infected or not.

- **Project 4:** Personal Portfolio
  Description : This project uses HTML, CSS, Javascript(web technologies), which describe about myself, skills, achievement and honours.
